

9th Annual Tide Mill Conference

NOVEMBER 8/9

TIDE

THE FORGOTTEN ENERGY SOURCE ?

EXPLORE THE WORLD OF TIDAL ENERGY!

For nearly ten years TIDE MILL INSTITUTE has been active in advancing appreciation of the human and technical heritage of American and international tide mills, encouraging research into the location and history of these mills and supporting the development of the use of tides as an energy source.

At this our 9th conference, we urge you to join other academics, environmentalists, practitioners of tide mill activity and just plain folks who will be sharing their interest in mills from the past and present and even the future - *from New York to Nova Scotia.*

When - NOVEMBER 8th & 9th

Where - THE GOULD BARN

Topsfield MA Historical Society
1 Howlett Street, Topsfield
